Saarinen Executive Chair and Stool

Eero Saarinen

Knoll

SAARINEN™ EXECUTIVE CHAIR AND STOOL Featured in nearly all Florence Knoll-designed interiors, the Saarinen Executive Chair has remained one of our most popular designs for nearly seventy years. The chair, which is now found in dining rooms as often as it is in offices, transformed the notion of what executive seating could be with its sculptural form and modern finishing. This iconic design is also available in a bar and counter height stool or with a swivel base.

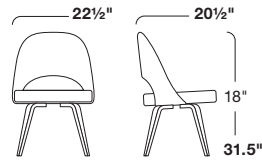

EERO SAARINEN An industrial designer and architect, Saarinen was known for his organic shapes, including the St. Louis Arch, Washington Dulles International Airport and the TWA Flight Center. Born to world famous parents, architect and Cranbrook Academy of Art director Eliel Saarinen and textile artist Loja Saarinen, Eero was surrounded by design his entire life. At Cranbrook, he met Florence Knoll, who later brought him to Knoll to pursue the company's earliest and most iconic designs.
